TIGER ROLL

GARAGE DOOR

Key Features:

- **Slats: Double-skinned aluminium, foam insulated (77mm)**
- **Operation: Electric motor with key fob transmitters (hold-to-run)**
- **Safety: Standard bottom rubber seal (optional safety edge available)**
- **Guide rails: 90mm (optional 75mm)**
- **Top box size: 300 × 300mm**
- **Finish: Wide range of colours available**

Hold to run control panel

Optional upgrade to Somfy One Touch control panel

Why choose the Tiger Roll?

The Tiger Roll is a premium roller garage door designed for homeowners who want a stronger, more substantial door without compromising on appearance or reliability. Suitable for both single and double garage openings, the 77mm foam-filled aluminium slats provide excellent rigidity, insulation, and long-term durability. The larger box and axle allow the door to operate smoothly over wider spans, making it an ideal choice where added strength and performance are a priority.

Engineered for everyday domestic use, the Tiger Roll combines security, thermal efficiency, and ease of operation in a clean, space-saving roller design that fits neatly behind the opening.

The Tiger Roll is ideal for customers who want a more robust roller door with improved strength and insulation compared to smaller slat systems. Its solid construction makes it suitable for a wide range of garage sizes, while the insulated slats help keep garages warmer, quieter, and more secure. With smooth electric operation and a tidy, compact finish, it offers a dependable, long-lasting solution for modern homes.

MINI ROLL

GARAGE DOOR

Key Features:

- **Slats: Double-skinned aluminium, foam insulated (52mm)**
- **Operation: Electric motor with key fob transmitters (hold-to-run)**
- **Safety: Standard bottom rubber seal (no safety edge)**
- **Guide rails: 66mm**
- **Top box size: 205 × 205mm**
- **Finish: Wide range of colours available**

Hold to run control panel

Optional upgrade to Somfy One Touch control panel

Why choose the Mini Roll?

The Mini Roll is a compact and practical roller garage door designed primarily for single garages and smaller openings where space is limited. Using 52mm foam-filled aluminium slats, it delivers reliable security and insulation while keeping the overall box size to a minimum. This makes it an excellent choice for garages with restricted headroom or customers looking for a neat, understated finish.

Despite its compact size, the Mini Roll offers smooth electric operation and dependable day-to-day performance, making it a popular option for standard domestic installations.

The Mini Roll is ideal for homeowners who want a reliable, insulated electric roller door at an affordable price. Its compact design makes it perfect for garages with limited space, while still offering the convenience and security of an electric roller system. Easy to install and simple to operate, it provides excellent value without unnecessary complexity.

CUSTOMER REVIEWS

Great job at a very competitive price

My roller door finally gave up so after being quoted over 4K + VAT thought I would see I I could find a better deal .
Came across rollerdoors.net filled in the online calculator and was really pleased with their price ,.
Rang and spoke to Lewis and Jay to finalise a couple of measurements. This was on Wednesday and on the following Thursday the guys arrived, took down and disposed of the broken door and fitted the new , trouble free installation by two very professional engineers all left tidy .
Great experience from start to finish at a very competitive price .

Highly Recommended; Professional and Courteous

In all my dealings with this company, I found them to be courteous and helpful.
When I had questions before purchasing, they responded quickly, and from then on, they continued to perform beyond expectations. The door arrived more quickly than expected, and when I had a couple of technical questions during the installation, they were addressed quickly and expertly over the phone, which meant I wasn't delayed at all waiting for a response. The product itself appears well-made and was exactly to my specifications. It functions perfectly. Highly Recommended

Fantastic

From my first request of information regarding the correct type of door for my new garage, to attending a site survey, through to my tiger roll door being installed and job completion at my home, this company know their game! Professional sales staff to deal with, kept me updated regularly with regards to my unit build time and arranging a convenient install date. Their fitters contacted me the day prior to install to confirm job description. They arrived on time as planned, kept the install area clean and worked with a clear methodical manner to install the door in just a little over 2 hours.

Great experience and a great product! I will be recommending Lewis and the team to anyone I know who is looking for a roller door!

Absolutely top class

Absolutely top class and brilliant experience with Rollerdoors.net! The online videos were really helpful and most importantly gave me the confidence that I'd have no problem fitting myself. Measurement instructions were tremendous and when I called just to validate the right measurement to choose and query about changing our existing face fitted door for a reveal fit they genuinely could not have been more helpful.

The product itself is really good quality, so impressed, definitely better quality than our old door which was about 20 years old and playing up a bit. Everything fitted together perfectly, the finish on the door and frame was perfect and everything just feels really good quality.

Installation was a breeze as long as you're competent with a decent drill. Mark and drill holes in the frame, screw in,
mount the motor unit and away you go, just watch the videos through a couple of times before you start and it will all be very familiar.

I literally could not be happier - and as we live just round the corner they even delivered it for free. Five stars, 10/10, 100% just perfect!

Super quality garage doors that fitted great

The delivery of my doors was extremely prompt and I was impressed with the build quality. I installed them myself as a DIY enthusiast with few problems. The online guides and tutorial video was very useful too

How to find us:

Heading from Stone via the A51, turn left at the roundabout onto the A519. Continue through Cotes Heath village through the national speed limit signs and after a 1/4 mile you will see a sign that says "Swynnerton Gate 4" on your left. Turn there and you will see the industrial estate at the end of Birch House Lane on the right, through the small gates.
